PRELIMINARY AMENDMENT

COMMISSIONER FOR PATENTS
WASHINGTON, D.C. 20231

SIR:

Prior to examination of the above-identified application, consideration of the following Amendments and Remarks is respectfully requested.

IN THE SPECIFICATION

Please replace the paragraph beginning at page 4, line 22 with the following:

In an embodiment of the present invention, an integrated design environment for a programmable integrated circuit stores the descriptions of the modules and devices available for configuration by the designer in a database that is formatted with extensible markup language (XML). The parameterization information is combined with the module and device descriptions to automatically produce a project configuration report. This combination is performed using an extensible stylesheet language (XSL) stylesheet. XSL may be used to transform the XML data into an HTML (hypertext markup language) file that is then rendered by a browser.
